Internship / Training

DSA Summer Bootcamp Trainee | Data Structures & Algorithms, Problem Solving

Jun 2025 – Jul 2025

Centre for Professional Enhancement, Lovely Professional University

- Completed an intensive CodeQuest: DSA Summer Bootcamp – Basics to Brilliance, focused on mastering Data Structures and Algorithms.
- Gained strong hands-on experience in solving computer science problems using optimized approaches.
- Learned and implemented key concepts including arrays, linked lists, stacks, queues, trees, graphs, recursion, and greedy techniques.
- Strengthened problem-solving, logic building, and coding efficiency through structured daily practice and assessments.
- Secured Grade A for consistent performance throughout the bootcamp.

Projects

Hospital Bed Allocation System | Django, HTML/CSS, Python (DSA)

June 2025 – Aug 2025

- Built a Django web application to manage hospital bed allocation using a priority queue based on patient severity.
- Implemented data-structure algorithms (min/max heaps) to ensure high-severity patients receive immediate bed assignment.
- Designed clean, responsive HTML/CSS interfaces for viewing patient lists, bed availability, and real-time queue ordering.
- Developed backend logic to auto-reorder patient priority as new admissions occur or severity levels change.
- Integrated secure CRUD features for adding, updating, and discharging patient records within the hospital workflow.

UP Industry Data Insights | Python, Pandas, Matplotlib/Seaborn

Sep 2024 – Nov 2024

- Analyzed a real-world dataset from Uttar Pradesh, India containing detailed information about state-wide industries.
- Performed extensive data cleaning, including handling missing values, correcting inconsistencies, and formatting large-scale categorical and numerical fields.
- Implemented statistical techniques to detect and remove outliers, improving accuracy and reliability of insights.
- Created visualizations such as bar charts, heatmaps, and trend plots to explore industry distribution, growth patterns, and regional variations.

Certificates / Certifications

CodeQuest: DSA Summer Bootcamp – Basics to Brilliance

Lovely Professional University —

July 2025

Java Programming

Neo Colab

Apr 2025

Ethical Hacking

Coursera

June 2024

Skills

Languages: C++, Java, JavaScript, Python

Technologies & Frameworks: Django, Plotly, Leaflet.js, Git, GitHub, HTML5, CSS3, SQLite, MySQL, Power BI, Excel

Domain Skills: Data Structures & Algorithms (DSA), Problem Solving, Data Visualization, Graph Algorithms, Data Cleaning & Preprocessing, Machine Learning

Data Science Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook

Education

Lovely Professional University

Aug 2023- Present

Bachelor of Technology - Computer Science and Engineering — CGPA: 7.5

Phagwara, Punjab

Greenway Modern School

2022 – 2023

12th — Percentage: 76.6%

Roorkee, Uttarakhand

Greenway Modern School

2020 – 2021

10th — Percentage : 86.2%

Roorkee, Uttarakhand
